Call-In Number

3:00 PM

Kyle Brock, GeoMap
Greg Heyer, Carlson McCain

1-866-881-3656
601-973-8712

Owners hired Kyle to help them develop project; B.J. in civil engg. (in business in Arizona), now working as development consultant

Agreement that entire area should be surrounded by silt fence. Silt fences will remain in place until ~~restoration~~ is deemed successful. Initial silt fences will be removed after ~~restoration~~ ^{after excavation}. Silt bag/tarps along slopes will remain a min. of 3 yrs or until slopes are stable.

Kyle or John will be onsite - someone will be onsite at all times to supervise. Carlson McCain prefers to have Kyle or John Reeves supervise. Greg (Carlson McCain) will do monitoring.

Thinks one species will provide enough diversity - may not need to vegetate. Western Juniper is to minimize erosion and provide seed source. Other species will wash in.

Kyle requested help from Greg to get seed mix

Will change acreage to 2.0 acres;

Will

Greg thinks this can be ready to go tomorrow. I mentioned we could maybe give verbal approval & follow up w/ letter.
